## When Technology Keeps Pace with Vision

As architects and designers envision new ways to use LED displays, technology must keep pace with their unique concepts. A case in point: Daktronics Freeform LED Elements help make the Sanya Aloha Hotel on Hainan Island, People's Republic of China, a landmark destination. Media facades, transparent LED displays, and architectural lighting energize the retail ambience in ways never seen before. View the video clips below to envision an entirely new LED technology application.

## Unum Group Installs Office Displays

The Unum Group needed two displays that could project vibrant images, even in direct sunlight, in a short time and Daktronics helped them do just that.
